AUTHOR INDEX

VOLUME 57

Akagawa-Matsushita, Masayo, 164
Alic, Margaret, 605
Archambault, Jacques, 703

Benson, David R., 293
Bickle, Thomas A., 434
Braun, Edward, 383

Calendar, Richard, 683
Cavalier-Smith, T., 953
Chiang, Gisela G., 725
Collier, Jackie L., 725
Craig, Elizabeth A., 402
Cronan, John E., Jr., 522

Danchin, Antoine, 623
Davidson, Elizabeth W., 838
Dehò, Gianni, 683
Desjardins, Anne E., 595
Dougherty, William G., 781

Errington, Jeffery, 1

Fath, Michael J., 995
Finkelstein, Richard A., 823
Friesen, James D., 703

Gambill, Diane, 402
Gold, Michael H., 605
Grossman, Arthur R., 725
Guntaka, Ramareddy V., 511

Hare, R. S., 138
Häse, Claudia C., 823
Heath, I. B., 367
Hénaut, Alain, 623
Hohn, Thomas M., 595

Jackowski, Suzanne, 522
Jackson, S. L., 367
Jacobson, G. R., 543
Jain, Mahendra K., 451
Johnston, Gerald C., 383

Klena, John D., 655
Koga, Yosuke, 164
Kolter, Roberto, 995
Krüger, Detlev H., 434

Lengeler, J. W., 543
Levy, Jay A., 183
Lindqvist, Björn H., 683
Liu, Jian-Wei, 838
Lowe, Susan E., 451

Magnuson, Kelly, 522
McCormick, Susan P., 595
Médigue, Claudine, 623
Meindl, Ursula, 415
Miller, G. H., 138
Morii, Hiroyuki, 164

Nelson, R. John, 402
Nishihara, Masateru, 164
Norris, S. J., 750

Palva, Ilkka, '09
Poolman, J. T., 34
Porter, Alan G., 838
Postma, P. W., 543
Pugsley, Anthony P., 50

Rather, P. N., 138
Riley, Monica, 862
Rock, Charles O., 522

Saier, Milton H., Jr., 320
Schaefer, Michael R., 725
Schnaitman, Carl A., 655
Semler, Bert L., 781
Shaw, K. J., 138
Silvester, Warwick B., 293
Simonen, Marjo, 109
Singer, Richard A., 383
Snippe, H., 34

Tam, Roland, 320
Titball, Richard W., 347
Treponema pallidum Polypeptide Research Group, 750

Verheul, A. F. M., 34164
Viari, Alain, 623

Werner-Washburne, Margaret, 383

Zeikus, J. Gregory, 451

SUBJECT INDEX
VOLUME 57

ABC transporters
  bacterial exporters, 995
Actinomycetes
  Frankia strains, 293
Aminoglycoside resistance genes
  molecular genetics, 138
Aminoglycoside-modifying enzymes
  familial relationships, 138
Anaerobic bacteria
  biology, 451
  biotechnological applications, 451
  ecology, 451
  environmental stress adapted, 451

Bacillus species
  mosquitocidal toxins
    genetic manipulation, 838
  protein secretion, 109
Bacillus subtilis
  sporulation
    control of morphogenesis, 1
    regulation of gene expression, 1

Calcium ions
  hyphal tip growth, 367
Colibri
  E. coli genome data base, 623

DNA restriction
  biology, 434

Enteric bacteria
  lipopolysaccharide biosynthesis
    genetics, 655
Escherichia coli
  Colibri
    genome data base, 623
  fatty acid biosynthesis
    regulation, 522
  gene products
    functions, 862
Extracellular solute-binding receptors
  bacteria, 320
  structural, functional, and evolutionary relationships, 320

Fatty acid biosynthesis
  E. coli, 522

Frankia strains
  biology, 293
Fusarium species
  trichothecene biosynthesis, 595

Gram-negative bacteria
  secretory pathway, 50

Heat shock proteins
  molecular chaperones of protein biogenesis, 402
Human immunodeficiency virus
  pathogenesis of infection, 183
Hyphal tip growth
  calcium ions, 367

Kingdom Protozoa
  classification, 953
  phyla, 953

Lipids
  methanogenic bacteria, 164
  polar, 164
Lipopolysaccharides
  biosynthesis
    genetics, 655
  enteric bacteria, 655
  N. meningitidis, 34

Metalloproteases
  bacterial, 823
  extracellular, 823
  zinc containing, 823
Methanogenic bacteria
  polar lipids, 164
Micrasterias cells
  model system for morphogenesis, 415
Morphogenesis
  Micrasterias cells, 415
Mosquitocidal toxins
  bacilli, 838
  genetic manipulation, 838

Neisseria meningitidis
  lipopolysaccharides, 34

P4 satellite phage
  genome propagation, 683
  helper exploitation, 683

Phanerochaete chrysosporium
  molecular biology, 605
Phosphoenolpyruvate:carbohydrate phosphotransferase systems
  bacteria, 543
Phospholipases C
  bacterial, 347
Phycobilisome
  light-harvesting complex, 725
Polyadenylation
  retroviruses, 511
Polypeptides
  T. pallidum, 750
Protein secretion
  Bacillus species, 109
Proteinases
  virus encoded, 781
Protozoa
  classification, 953

Receptors
  bacteria, 320
  extracellular solute binding, 320
Retroviruses
  polyadenylation, 511
  transcription termination, 511
RNA polymerases I, II, and III
  eukaryotic, 703
  genetics, 703

Saccharomyces cerevisiae
  stationary phase, 383
Satellite phage P4
  genome propagation, 683
  helper exploitation, 683
Secretory pathway
  gram-negative bacteria, 50
Sporulation
  B. subtilis, 1

Transcription termination
  retroviruses, 511
Treponema pallidum
  polypeptides, 750
Trichothecene biosynthesis
  Fusarium species, 595

Virus-encoded proteinases
  similarities with cellular enzymes, 781
